

Globale farger

Vårt fargesystem består av globale og semantiske farger. De globale fargene er alle fargene vi har i designsystemet vårt. De semantiske fargene refererer til de globale fargene og beskriver hva fargen skal brukes til. Vi har latt oss inspirere av NAV sitt oppsett og det kan du lese mer om her: <https://aksel.nav.no/grunnleggende/styling/farger>.
