

Control Guide for the Norwegian Emergency Passport

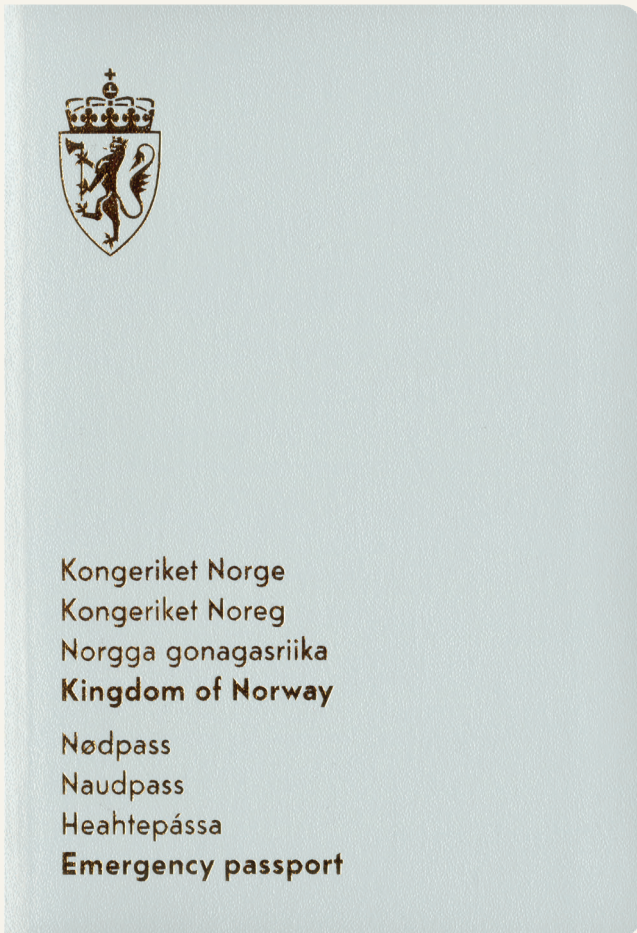

Issued from 01. 01. 2022 -

Kongeriket Norge
Kongeriket Noreg
Norgga gonagasriika
Kingdom of Norway

Nødpass
Naudpass
Heahtepássa
Emergency passport

The cover

Hotfoil stamping

The coat of arms and the text are produced with gold hotfoil stamping.

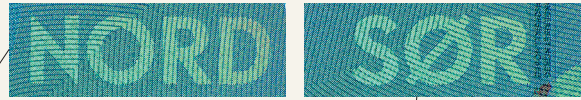

Blind embossing

The rear cover features motifs in relief.

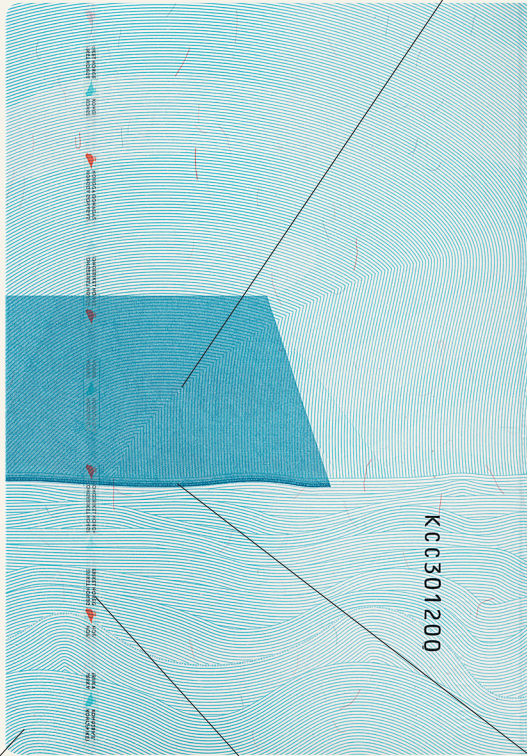

Cover included, the Emergency passport has twelve pages. The overprint, the data field captions and parts of the micro text is written in Norwegian Bokmål, Norwegian Nynorsk, North sami and English. In this guide this will be described as "four ways".

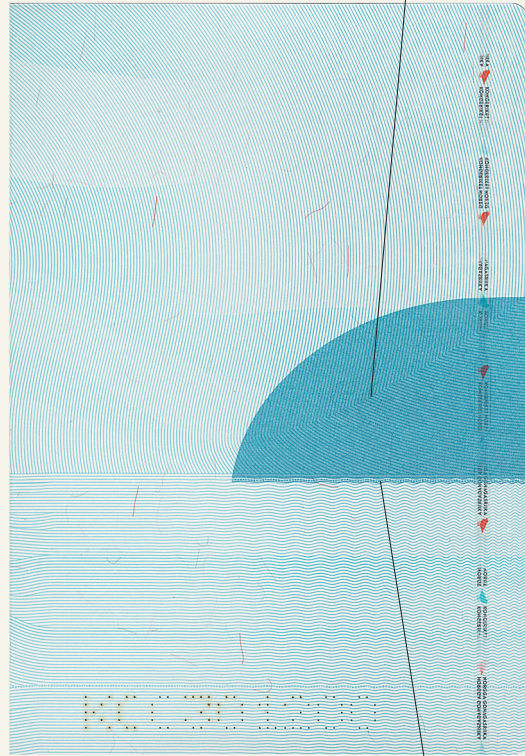

The endpapers

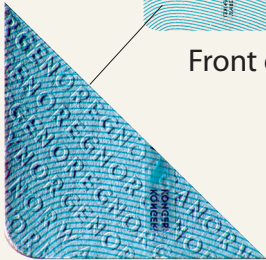

Latent images in intaglio

Front endpaper

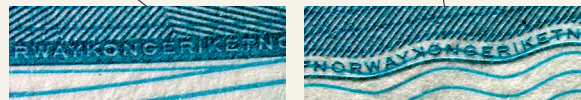

Rear endpaper

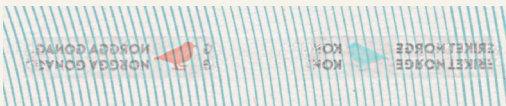

Blind embossing

Bottom left corner of the front endpaper. Kongeriket Norge in "four ways".

Microtext

Inverted and positive microtext in intaglio. Kongeriket Norge in "four ways".

White light

UV light

Security thread

Turquoise and orange images of Norway's national bird the Dipper and Kongeriket Norge in "four ways". The thread fluoresces in a rainbow print of cyan, magenta and yellow.

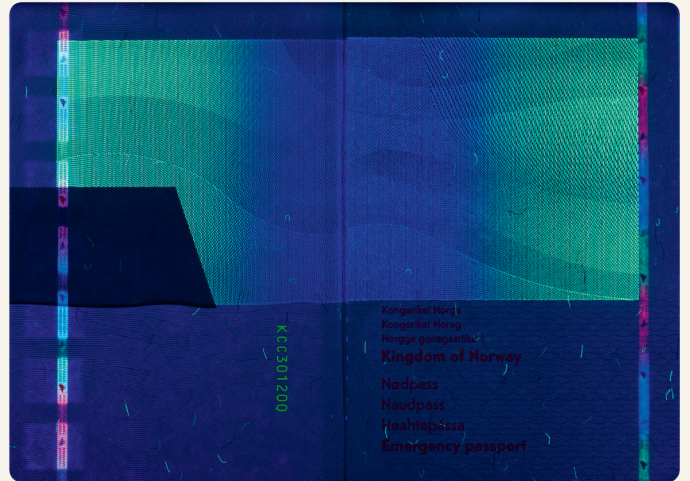

Document number

Produced with letterpress. Fluorescent under UV light.

The spreads and the background printing - In white light and UV light

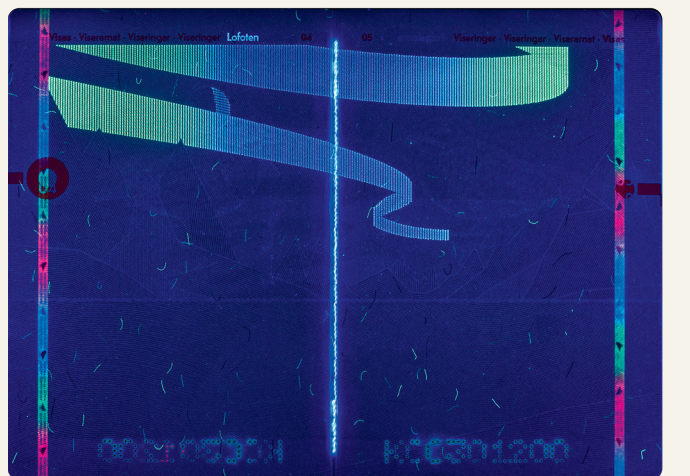

Front endpaper & page 1

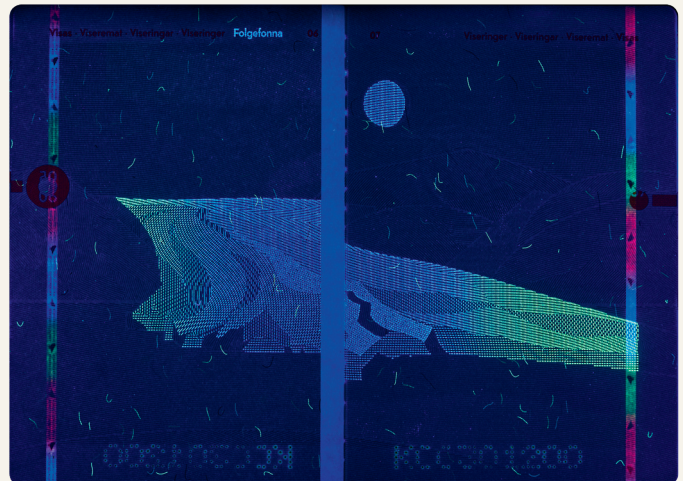

Pages 2 & 3

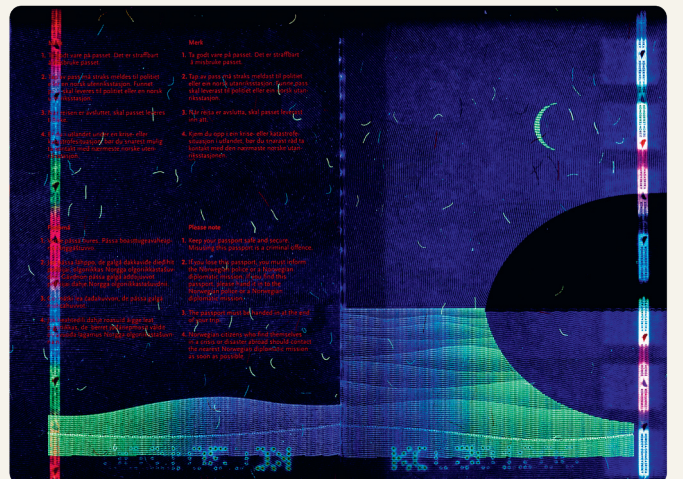

Pages 4 & 5

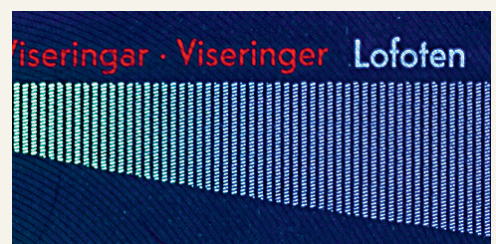

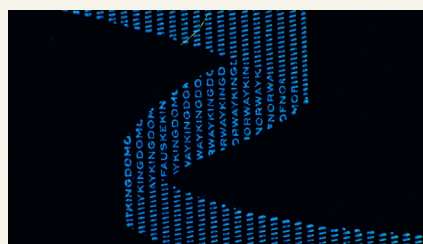

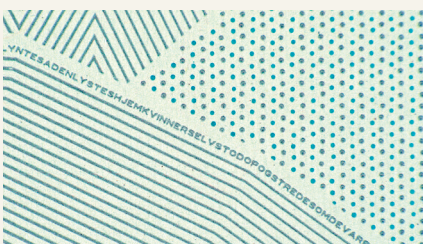

Pages 6 & 7

Page 8 & rear endpaper

Background printing

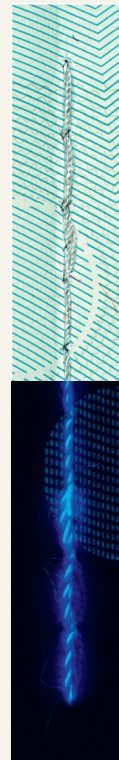

Each spread has an illustration of a unique Norwegian scenery. Location name on top of page is only visible in UV light. Under white light all pages have a unique microtext from the lyrics of the Norwegian national anthem. Every spread also has microtext only visible in UV light. All spreads have UV reactive rainbow print.

The paper, stitching, and pagination

Watermark

Multitone watermark depicting Norway's national bird the Dipper. On all pages the beak points toward the spine of the booklet.

White light

UV light

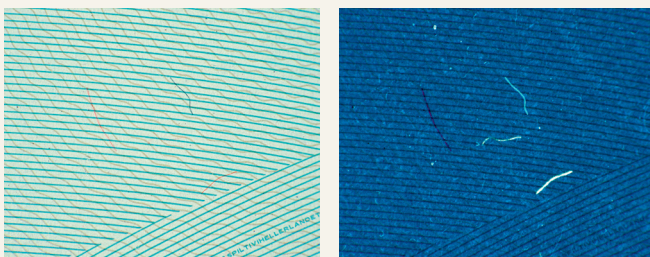

The seam

The thread has three strands. Two white and one grey. One of the strands has a bluish-white fluorescence under UV light. At both ends of the seam there are three return stitches.

Pagination

Collated vertically "wandering" pagination. Page no. in inverted microtext. UV reactive ink fluoresces in red. See-through register on leaf with pages five and six.

Security fibres

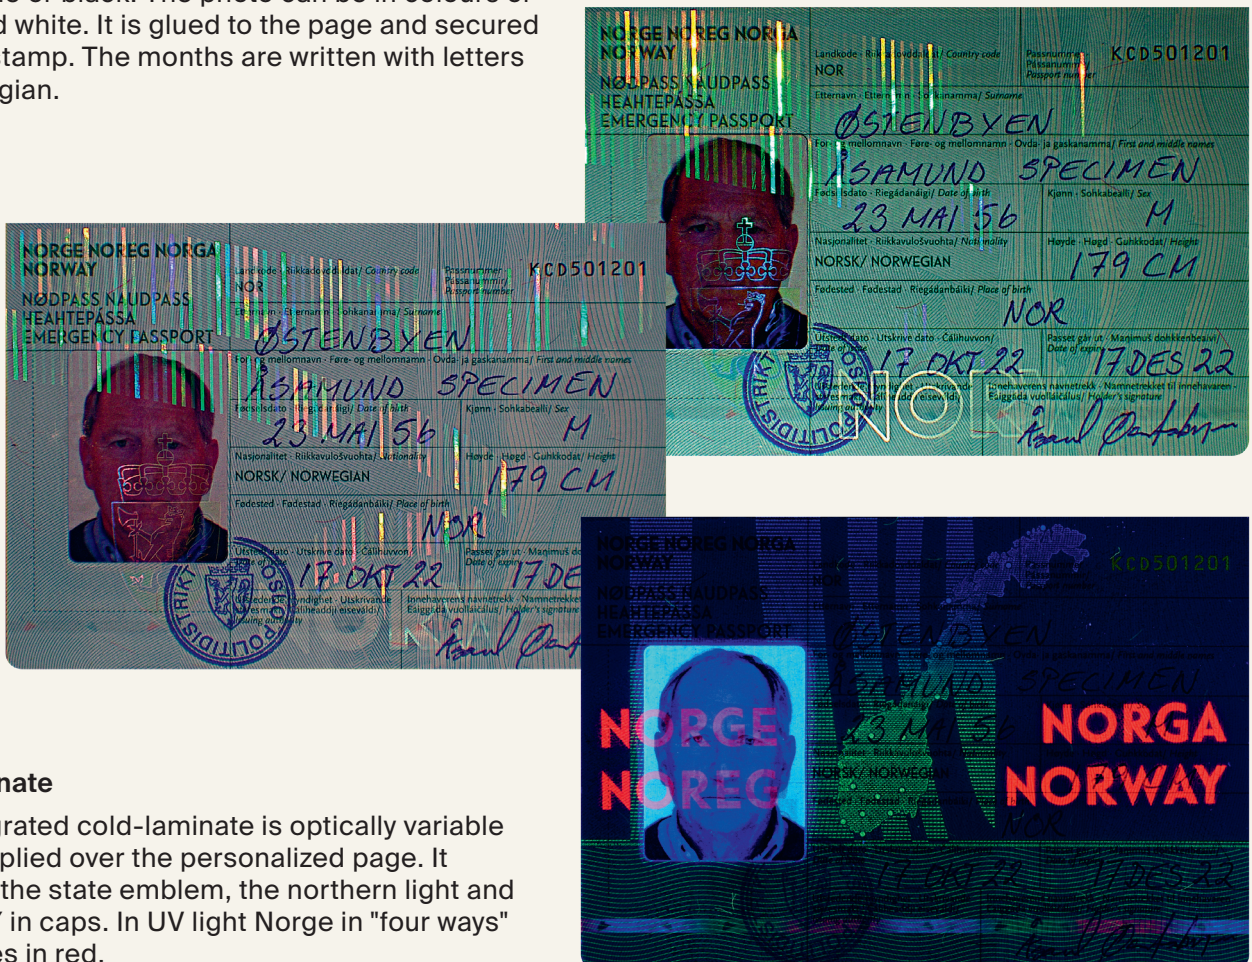

Visible fibres in red and blue/green. Fluorescent fibres in yellow and green under UV light.

The bio page

Personalization of the Emergency passport

The personalization on page two is handwritten in either blue or black. The photo can be in colours or black and white. It is glued to the page and secured by a wetstamp. The months are written with letters in Norwegian.

The laminate

The integrated cold-laminate is optically variable and is applied over the personalized page. It contains the state emblem, the northern light and NORWAY in caps. In UV light Norge in "four ways" fluoresces in red.
